"We are a leading solution provider, turnkey system Integrator and innovative solution go-to."

We are committed to our clients in the strategic design and seamless execution of innovative, state-of-the-art products that are delivered within budget and agreed time scales."

— Clement Ali

How We Work

1

We explore, produce, and deliver energy to meet society's growing needs.

2

Alipta seeks opportunities in energy investments in hydrocarbon as well as in renewables globally and maximizes value through our integrated business model.

3

Our customers are at the heart of everything that we do, and our operations are anchored on meeting their needs.

Our Portfolio

Our portfolio includes conventional and unconventional resources as well as a diverse range of fuel lubricants, and petrochemical products.

This is further strengthened with a successful product delivery track record.

Our Products

FUEL

Alipta supplies both diesel and blend fuel. We understand that timely customer service, fuel quality, and price are important factors to consider when choosing a bulk fuel supplier. Our combined experience in the fuel industry has created a knowledgeable team dedicated to providing your business with industry-leading service and quality with a competitive price

LUBRICANTS

We are an Authorized ENGEN and PETRONAS Lubricants Reseller:
<https://www.engen.co.za/lubricants>

We specialize in automotive and industrial lubricants, greases, additives and car care products.

We supply lubricants in the following sectors:

Automotive • Agricultural • Manufacturing
Industrial • Mining • Power Generation
Transport

BULK FUEL

Alipta supplies bulk fuel around Zimbabwe. Whether it's an agriculture, mining, or construction operation, there can be considerable benefits to managing an onsite refuelling facility.

A safe, well-built well-managed fuel storage system can improve operational control, reduce vehicle off-site downtime, and generate positive Return on Investment.

Our Products

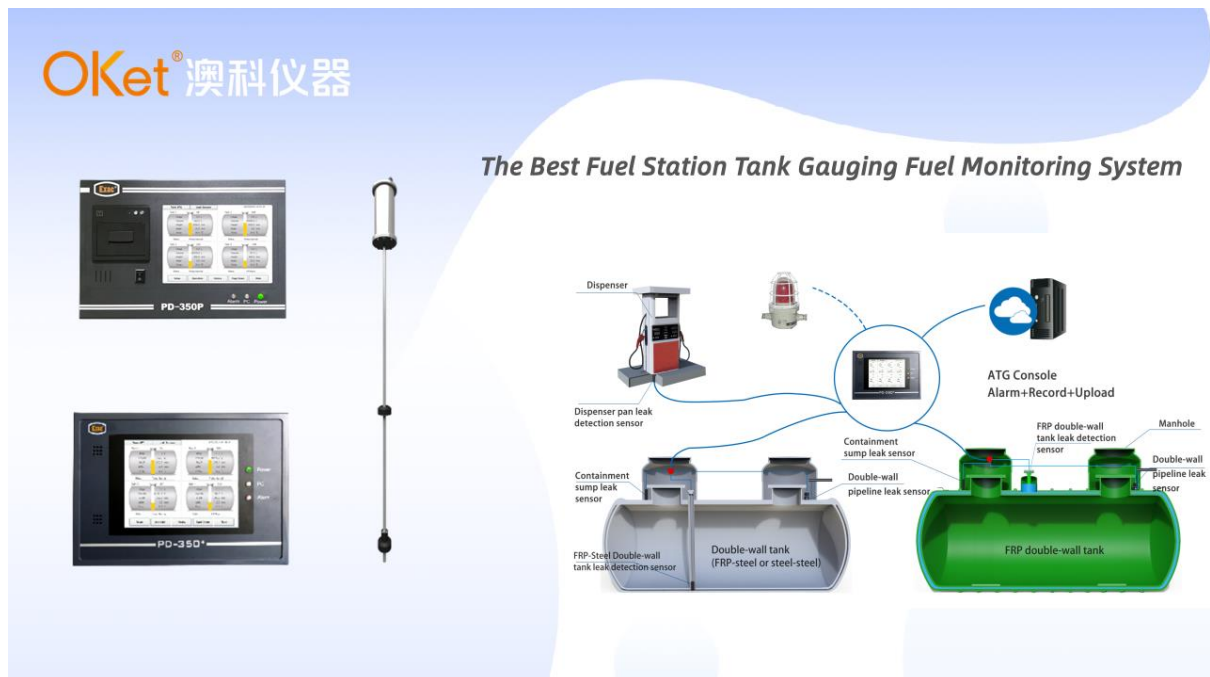

AUTOMATIC TANK GAUGING SYSTEM (ATG)

Automatic fuel tank gauge is used for monitoring fuel liquid level, volume, and temperature inside fuel storage tanks. It is widely used at gas station and skid-mounted fuelling site.

The tank level gauge smart console is a powerful product developed and produced by OKet. Together with PLS-5B series magneto strictive liquid level meter constitutes the complete automatic fuel tank gauge system. The smart console is the display terminal of the automatic fuel tank gauge and can detect 1 to 16 tanks at the same time. It can monitor **product level, water level, temperature, product volume, water volume, empty volume, all kinds of alarms, inventory, and delivery information in real time.**

International graphic touch screen and user-friendly icon, makes it is easy for new users.

Our Products

RETAIL SERVICE STATIONS

We intend to build state-of-the-art service stations with modern technology to cater to the ever-evolving customer needs.

Alipta Service Stations will operate 24 hours and will provide convenience offerings of a shop and fast food as a standard:

ALIPTA TRACKING

ACCESS CONTROL

Our options include facial recognition, biometric, and card access terminals connected to door-locking systems coupled with PC Server software to keep your points of access secure and monitored.

CCTV

Monitor access, unauthorized activities, theft or criminal damage, and personal safety or even provide a remote response to an intrusion.

ALARM SYSTEM

Designed to detect intruder presence. When detected, a siren will activate and communicate an alarm signal to all our highly sophisticated monitoring devices from where an appropriate response will be coordinated. Intruder systems can be either hard wired or wireless

VEHICLE TRACKING & FUEL MONITORING SYSTEM

The system tracks a vehicle & at the same time gives you online fuel levels, thus location & fuel monitoring same time.

✓ Mobile App Available

Our Products
